## 1 - Atlas Commercial Fisheries around Ireland

: d4b94157-1f67-4ab2-bf63-27a6392b4451

**Abstract :** The atlas reviews the fishing activity on fish stocks of relevance to Ireland that come under the EU Common Fisheries Policy (CFP). The atlas focuses on fishing opportunities such as Total Allowable Catches (TACs), landings trends, fleet activity and the state of the resource in the waters around Ireland (principally ICES Sub-areas VI and VII). The Atlas also deals with fish stocks exploited by Ireland outside Sub-areas VI and VII. Every effort has been made to use the most up to date information available on fishing opportunities, landings, effort, and on the state of the resource base. The various ICES and STECF reports and databases together with various EU Regulations should be consulted for the definitive figures and regulatory articles. Data available for download includes: Shapefiles and ArcGIS compatible GeoTiff Images.

**Keywords :** *fish, species, fish stock, fisheries management, fishery resource , North Atlantic Ocean , Species distribution*

**Schema :** iso19139
